

SEQ266: text-supported held-identifier transfer

One training seed | Same topology family | No automatic checkpoint promotion

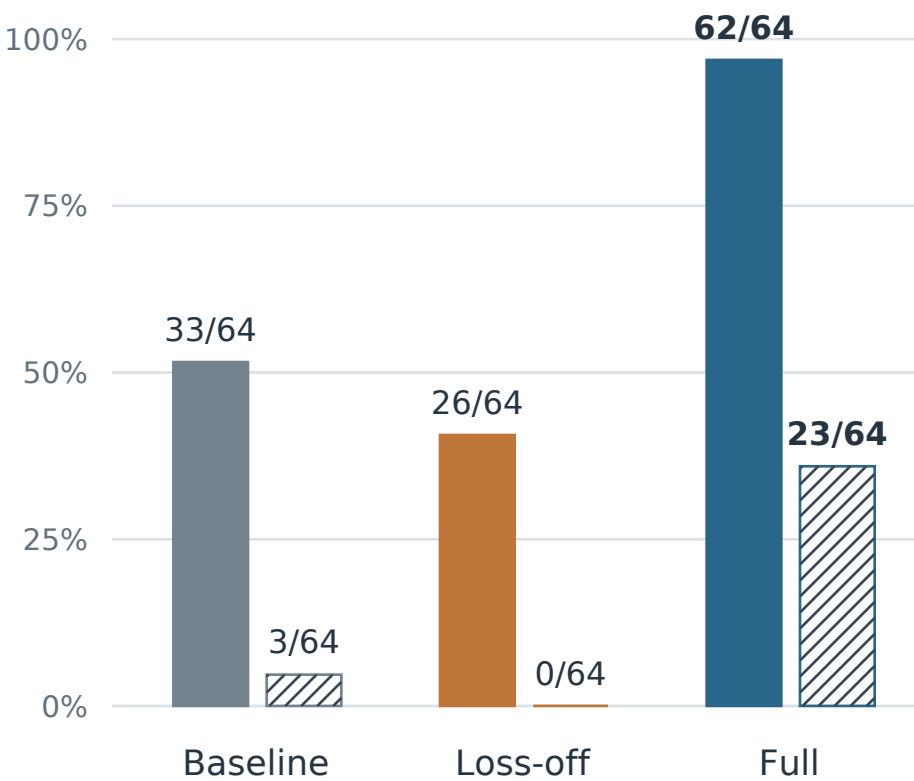

OWN_TEXT: actual stored EVENT text UNAVAILABLE: stored text withheld

Engineering conjunction: **FAIL**

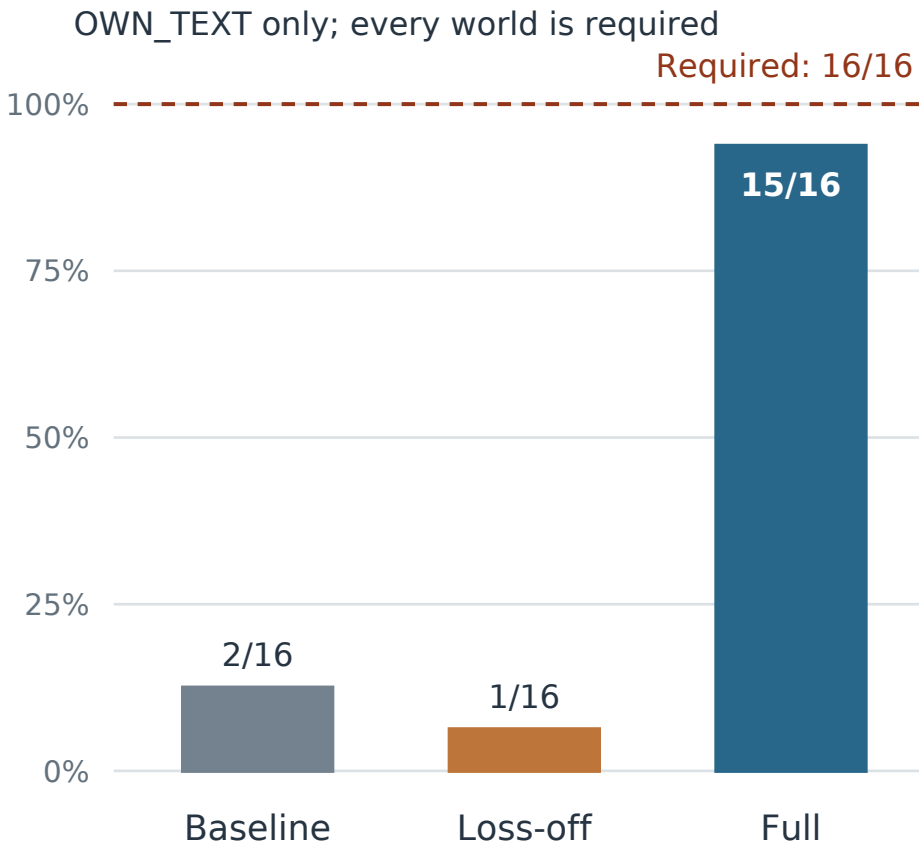

A Strict opposite-goal pairs

B Individual goals

C Worlds with a correct pair

Four presentations/trajectory; 1,452 new terse targets; 2,928 updates/fit. Old W0/W8 and audit: 16/16 in every state.
All 32 pairs and 16 worlds retained. The preexisting invalid EVENT remains: no exclusions or repaired source.
No error bars: one training seed. Not a rich-supervision, new parametric-memory, or H1/H2 result.
